

CLIENT SETUP - Book a Doctor System

Objective

Configure the React frontend using Vite and prepare the client application for development.

Implementation Steps

1. Open the Client folder in the VS Code terminal.
2. Run: `npm create vite@latest . -- --template react`
3. Select **React** framework.
4. Select **JavaScript** variant.
5. Navigate using `cd client`.
6. Install dependencies using `npm install`.
7. Start the application using `npm run dev`.

Technologies Used

React.js, Vite, JavaScript, React Router, Axios, CSS, React Icons.

Result

The client application is successfully created and runs locally, providing the frontend interface for the Book a Doctor System.
